Acosta in his 60th year. He was a charity patient at the Jewish Consumptive Relief Society's sanitarium in suburban Spivak.

In 1927, one month after Charles Lindberg soloed across the Atlan-tic, Acosta piloted Adm. Richard Byrd's tri-motored Ford "America" from Long Island to France. Their goal was Paris, but after a 32-hour flight over the stormy water they circled above an overcast for 10

Acosta finally spotted a break in the clouds and nosed earthward. The "America" crash-landed in the surf, 12 feet from the French shore. Acosta, Byrd and two other companions on the hazardous flight

paraded in triumph down Broadway on their return to New York.

But Acosta lost his pilot's license for stunting and was fined \$1,000 for flying a plane that had been seized by a sheriff. Then he was jailed for five months, charged with abandoning his second wife

and their two children. He collapsed on a New York street two years ago, penniless and ravaged by advanced tuberculosis. Recently he developed cancer.

NOTE

To the Citizens of Saline and Adjoining Counties:

There has been a Labor Day celebration for half a century in Harrisburg, sponsored by the Saline County Trades and Labor Assembly, made possible by donations from the business and professional people and all laboring class of people of Saline county.

For the past three years we have been required to pay for the use of the fairgrounds up to as high as \$425.00. The local unions of Saline county voted in a meeting at the Saline County Trades and Labor Assembly headquarters at the Labor Temple, that there would be no Labor Day celebration this year due to the fact that the Fair Association wanted \$250.00 for the use of the fairgrounds, and retain concession rights, or \$425.00 with the Trades Council holding concession rights.

The locals in the Saline county area would not donate to this Labor Day celebration due to the fact that we have to pay to use the fairgrounds.

Funds which have been solicited and received from business and professional men of Harrisburg, and contributions from local unions, which ordinarily would have been used in putting on the Labor Day celebration, will be turned over to the Harrisburg Junior Chamber of Commerce factory drive fund.

Business firms, individuals and local unions who had been contacted, but have not made contributions, and those who have not yet been contacted, are invited and requested to make the contribution ordinarily given the Labor Day celebration, and this also will be turned over to the Junior Chamber of Commerce factory drive fund.

The co-operation of all who have taken part in the previous Labor Day celebrations and who have already or will later take part in the factory drive fund is most sincerely appreciated by the laboring people of Harrisburg.

CARBONDALE, Ill. — Southern Illinois University looked forward today to another record fall enrollment as the registrar's office reported that some 3,376 students had pre-registered for classes be-

Regular registration for new students does not start until Sept. 8 but the total number of students who had signed up at the end of pre-registration last Saturday approaches the final enrollment figure last year. Last fall, enrollment set a record, climbing 16 per cent over the previous year. Housing was the most serious problem as Southern prepared for the invasion of new students, including an estimated 1700 freshmen. The registrar's office said admissions were still being accepted but the University would not guarantee living quarters. Local householders were solicited to offer spare rooms to students after the two student dormitories and other campus dwelling units were filled to capacity. The registrar's office said one

of the reasons why pre-registration was especiany heavy this year was because freshmen students were permitted for the first time to enroll before New Student Week. Registrar Robert A. McGrath points out that pre-registrants would be dropped from the rolls if they failed to pay fees before

Sept. 1.
Pre-registered students include only those who will study on the University campus and at the Voeational-Technical Institute day school. Not listed are elementary and high school students of the University School, and those in ex tension and adult education class

The Strange Vargas Case

By BRUCE BIOSSAT

Having just tried a few months ago to fathom the mysteries of Latin-American politics in Guate-mala, we must now endeavor to thread our way through the strange events that led to the suicide of Getulio Vargas, president of Brazil.

The story began with one Carlos Lacerda, an editor and broadcast-er who attacked Vargas furiously. An unsuccessful assassination at tempt was made against Lacerda. Unfortunately, a bullet meant for him killed a young air force major and a terrific stir followed.

It was disclosed later that Lacerda's assassination had been plotted by Vargas' private bodyguard, which put responsibility for the young officer's death squarely at his door. This was so even though no evidence was brought out that either Vargas or his son, also an object of Lacerda's attacks, had instigated or had knowledge of the plot beforehand.

All monopolies are dangerous. Most of them are evil, except when properly and firmly controlled by public authority as in the case of municipal transit systems. However, no economic monopoly in history compares in evil consequences with political monopoly. This realization provides the key to the new American liberalism epitomizing the basic philosophy of the Eisen-

CHARLES F. CARPENTIER

Once again, holiday weekend ime is approaching. The Labor Day weekend is the occasion when a great many people plan to take the last outing of the summer season, and as a result, highways are crowded and danger is high.

During the past two or three months, you have gained experience as a driver, so if you intend to be on the highways over the coming weekend, put that experience to

good use. You know a little more now than you did last May or June about the variety of unexpected and unusual things other drivers can do, so you are better prepared to meet those conditions.

Remember the fellow who shot out of the side road in front of you, fellow who neglected to signal when he was going to turn, the boob who passed you on a hill and almost ran you off the road when another car came over the hill, the fellow conducting his own guided tour who was so occupied pointing out the sights to his passengers he drove on your side of the road more often than on his.

Be ready for them this coming weekend, because you will probably meet them all again. If you are ready for them, it will be a happy holiday weekend, not a tragic one

4 Important Reasons why

RIGHT NOW!

Pontiac is One of the Greatest Cars Ever Built!

Match today's Pontiac with America's finest cars and you'll get a dramatic picture of Pontiac value. First of all, Pontiac is big-bigger, in fact, than many cars costing hundreds of dollars more. Pontiac is beautiful-with its distinctive Silver Streak styling. Inside, you'll find genuine fine-car luxury and appointments-along with the roominess and comfort that come only with a long wheelbase. But the big surprise comes when you test Pontiac's performance. See how alert it is to every demand in traffic, how it handles and corners almost without effort, how it takes to the open road with plenty of power to spare and saves money every mile.

Pontiac has the Best Resale Value in its Price Class!

Along with all its fine-car size, luxury and performance, Pontiac has a very special attribute no car at any price can beatits unsurpassed reputation for year-in, year-out dependability. Pontiac's carefree, economical long life and its proved record of amazingly low maintenance expense are so widely known and acknowledged that it commands the highest resale value in its price class. Because Pontiae is America's most desirable used car, your original investment comes back in greater measure when you trade, making ownership cost even lower.

Pontiac is Priced Just Above the Lowest!

After you've convinced yourself of Pontiac's value, after you've considered all the good things you've heard about its dependability-see and compare it dollar-wise. Despite the fact it's a fine car in every sense of the term, it's priced so near the lowest that if you can afford any new car you can afford a Pontiac.

We'll Make You a Deal You Can't Afford to Miss!

Right now we're making such liberal trade-in allowances that you just can't afford to pass up the greatest opportunity you ever had to become a fine-car owner. Come in and get the facts.
